## EDUCATION

**St. Petersburg College**                                                    **January 2021 - July 2022**
*Bachelor of Science in Technology Development and Management*
- **Honors:** President's Honor List

**St. Petersburg College**                                              **January 2019 - December 2020**
*Associate of Science in Computer Programming and Analysis*
- **Honors:** President's Honor List

## WORK

**General Assembly**                                                          **January 2023 - Present**
*Software Engineer Fellow*
- Full-time fellow in the software engineering immersive program, I design and build web applications using a hands-on approach with 400+ hours of professional training.
- Showcased full CRUD functionality with Javascript, React, Mongoose and Express.

**Telesmatic Systems LLC**                                              **August 2020 - January 2021**
*Software Engineer Intern*
- Collaborated with a team of engineers to efficiently resolve customer tickets, ensuring high-quality customer satisfaction and timely issue resolution.
- Identified and resolved bugs documented by the QA team, thus improving the quality of the product and the user experience.

## PROJECTS

*[Mamma Mia! Match 2! Memory Game]*                                                          [Github]
- Developed using Javascript, HTML, and CSS, implementing a mobile-first design.
- The project was crafted with a mobile-first strategy for cross-device accessibility and optimal user experience.
- Enhanced the user experience with immersive sound effects.

*[NetMart]*                                                                                  [Github]
- Used Javascript, HTML, Python, Django, CSS, and PostgreSQL was the database of choice.
- Leveraged the RedCircle API to allow users to search the database and see the details.
- The project allowed users to buy and sell items by filling out the respective form.

## SKILLS, ACTIVITIES & INTERESTS

**Technical Skills:** HTML, CSS, Python, Javascript, Express, Mongoose, MongoDB, Django, PostgreSQL, React, Git, Github, Agile Development
**Certifications & Training**: Computer Programmer - St. Petersburg College
**Relevant Coursework:** Algorithmic Design and Development / Advanced Program Development
**Interests:** As an aspiring application developer, I am passionate about software engineering and turning innovative ideas into functional code. I thrive when working collaboratively with other software engineers who share my passion for developing creative and efficient solutions.
